

Dispatch software **built by truckers,** **for truckers**

Simple, affordable software for managing driver jobs, multi-drop deliveries, messages and proof of delivery — built around how haulage actually works.

THE DAILY DISPATCH PROBLEM

Many haulage teams still rely on phone calls, paper notes, WhatsApp messages and memory. That works — until a load changes, a message gets missed, or no one has a clear record.

WHAT HGSS GIVES YOU

- **Dispatcher board** to create and manage work
- **Clear driver load screens** with job details and instructions
- **Multi-drop barcode scanning** for fast delivery confirmation
- **Optional photo proof of delivery** for disputes and records
- **Driver-to-dispatcher messaging** with a clear history
- **Load history and admin controls** for better oversight

**LESS CHASING. LESS CONFUSION.
CLEARER DISPATCH.**

EARLY PARTNER

PROGRAMME

Try HGSS with your fleet.

Practical, affordable software designed around how haulage actually works — without complicated setup or unnecessary features.

Limited early partner places available.
